FIXING FROM BELOW

FIXING FROM ABOVE

Short Description

A system of sun awning poles manufactured by Besenzoni that can be installed within minutes to provide shelter from the heat. Since every gram of weight on board is important, these poles have been made from both aluminium and carbon fibre to keep additional weight to a minimum, as well as ensuring they are resistant to the marine environment.

- Fixed height sun shade pole made from either powder coated aluminium (in a range of colours) or matte finish carbon fibre
- Available in a fixed or telescopic version with heights from 140cm to 220cm.
- To be used with Besenzoni Shallow Base sockets, designed for simple installation from both inside or outside the hull.

- Clamcleat® rope tension system integrated into the pole.

Description

Quick Installation
Shelter from the sun in minutes.

Installation from above and below deck.

FIXING FROM BELOW

Clamcleat® rope tension system integrated into the pole.
