Product Images

Short Description

The *Shower Power* stainless steel shower head incorporates an LED lighting system in either white or RGB colour change. In addition, the shower head can be supplied with either a recessed or surface mounted fixing method. The shower is secured in place with 4x 316 grade stainless steel screws.

Shower Power RGB is supplied complete with the 6015 RGB control unit. This requires an input of 24Vdc and offers simple control of the colours produced. Separate switching is required to control the RGB ECU (not supplied).

- 316 grade stainless steel shower head
- Integrated LED in either static white or RGB colour change

- Recessed or surface mounted models available
- 24Vdc input (driver required for mains voltage application)

Description

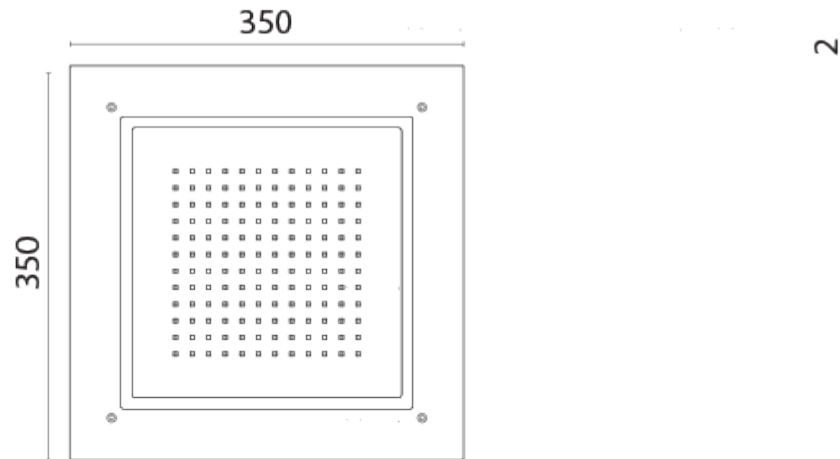

Product Drawing

The shower is available in two variants, surface mounted and recessed. In both cases, the shower is fixed in place with 4x screws.

4171 - recessed

4170 - surface mounted

RGB Control

The RGB variant of the shower is supplied complete with the 6015 RGB controller. This requires external switching in order to switch between the colours available. This means that any switching can match the switch gear used elsewhere in a project.

The RGB shower requires a 24Vdc power supply and therefore an LED driver should be used for mains voltage applications.

Additional Information

Input Voltage	24Vdc
Wall Mounted	No
Hose Connection	1/2" BSP Female
Weight (kg)	2.300000
Manufacturer	Foresti & Suardi
Finish	316 Stainless Steel
