Short Description

The *Flatwash* shower mixer is a progressive mixer especially designed for use with the [Flatwash pull-out shower](#). The mixer operates by simply turning the lever to start the flow and regulate the temperature. The further you turn, the warmer the water gets.

The innovative slimline design helps the shower seamlessly blend into the installation surface. The mixer can also be installed on a horizontal or vertical surface. An [installation plate](#) for the mixer and pull out shower is also available as an accessory.

- Chrome plated brass mixer for use with the [Flatwash pull-out shower](#)
- Horizontal or vertical fixing
- Simple progressive mixer action controls flow and temperature
- Available in two versions, with a lever or with a knurled grip.
