

Rotary Dimmer For LED Lighting

£11.99

Excl. Tax: £9.99

Product Images

Short Description

This is a very simple but effective rotary dimmer switch for use on low voltage circuits. The dimmer switch allows for the brightness control of LED luminaires from 0% - 100%.

Maximum current output for the dimmer module is 6 Amps and the fitting will operate on 12 or 24Vdc.

- Simple dimmer unit with rotary switch
- 12 or 24Vdc input/output
- 8 Amp maximum capacity
- Compact size means that the dimmer can be discretely installed in a cupboard or hidden location

Additional Information

Weight (kg)	0.300000
Input Voltage	12 / 24Vdc
Output Current	8 Amps Max.
IP Rating	IP20
Dimmer	Yes
Dimming Type	0-10V / 1-10V
