Short Description

This is a very simple but functional stainless steel mooring cleat. Made entirely from 316 grade stainless steel, the deck cleat is simply held together with the M8 fixing bolts visible from the top. A counter plate and self-locking nuts are included with the cleat.

The top section of the cleat is mirror polished in order to offer the highest possible resistance to corrosion.

Description

Product Code	A	B	C	D	E
208000SS	100	30	35	35	165
