

P416 President

Product Images

Short Description

The Besenzoni P416 President has become an iconic pilot seat in the nautical sector. The design has been refined over its life but the basic form remains true to the original concept. The P416 President is, without doubt, one of the most comfortable helm seats on the market. With a multitude of adjustments available in order to ensure the perfect navigating position can be reached for any user, the P416 remains an excellent choice for the helm of any yacht.

On request the President seat can have an automatic floor mounted sliding system, making it a perfect choice for a helm where the pilot chair may need to be slid away from the main controls.

This pilot seat can be customised to a large extent, with a choice of upholstery materials including customer

own supply. Other customisable features include embroidery details such as stitching pattern and inclusion of an embroidered logo as well as custom armrest solutions. In addition, the seat can be personalised with a range of pedestal and footrest combinations.

We encourage any prospective client to contact us to discuss their requirements so that we may be able to guide them through the purchase of this product and help select the options required.

Description
