Short Description

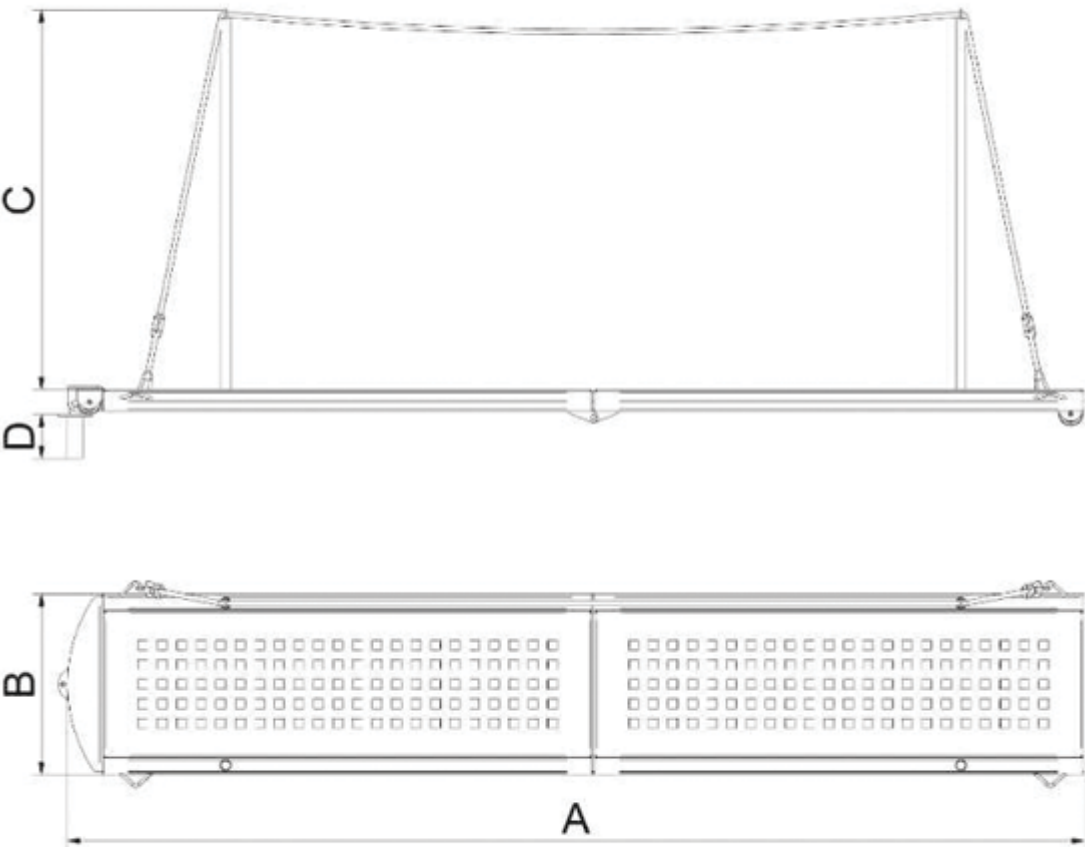

This manually folding passerelle is the perfect solution for small craft where a permanent gangway cannot be installed. The product is constructed entirely from 316 grade stainless steel and is finished with an iroko timber walkway.

The product has some excellent features such as a pair of wheels for when resting on the dockside, removable stanchions with a rope handrail which can be installed on either side of the passerelle and a rotating pivot and built-in bush in order to allow the passerelle to move freely together with the craft and

avoid any damage with the keyside.

The product is handmade in Italy to order, we will confirm a lead time upon order.

Description
