

SC 107 Manual Bathing Ladder

Product Images

Short Description

- Manual, drop-in bathing ladder
- Stainless steel or carbon fibre structure (see description below)
- Teak steps
- Foldable structure and handles for an easy stowage on board

Description

The SC107 manual bathing ladder is an excellent lightweight temporary ladder solution. The ladder neatly folds when not in use, allowing for easy storage on board. When the ladder is required, it can be simply unfolded and dropped into permanently mounted deck sockets.

Two versions of the SC107 bathing ladder are available. The 5 step variant is constructed from stainless steel and the 7 step version is constructed from carbon fibre. Both models can be specified with teak treads and a variety of sprayed finishes.

Additional Information

Folded Length (mm)	790.00 (2030.00 - 7 steps)
