- Ladder structure made from polished or powder coated stainless steel
- Steps made from solid teak
- Sensor to alert helmstation when the ladder is deployed in the water
- Aluminium housing box
- To be used together with an electro-hydraulic control unit (power pack)
- Available with 4 or 5 steps as standard, 6 steps available on request
- Automatic handles with non-slip grip are available as an optional extra

Description

The *SI401 Big Marea* bathing ladder is a firm favourite of yacht manufacturers worldwide. Being a fully automatic system, the ladder simply deploys at a touch of a button. The ladder functions on a hydraulic system and requires a power pack to operate. This can either be a standalone unit solely for the ladder (sold separately) or it can be grouped together with other hydraulic products on a centralised system on board.

The ladder is constructed from stainless steel and can be supplied in either a polished or powder coated finish. Solid teak steps finish the ladder and offer a high quality feel, extending the teak deck into the water.

The *SI401 Big Marea* features an electronic sensor system which can be used to alert the helm when the ladder is deployed and can for instance be used to immobilise engines.

The ladder can be further customised on request with automatic pop-up handles to aid boarding or even with custom dimensions.

Additional Information

Cassette Height (mm)	150.00
Cassette Length (mm)	1325.00 min.
Cassette Width (mm)	560.00
Step Width (mm)	420.00 (340.00 with handles)
Operation Type	Hydraulic
Weight (kg)	60.000000
Manufacturer	Besenzoni
