

SI 407 Bathing Ladder

Product Images

Short Description

Automatic Retractable Bathing Ladder

The SI407 Aquarius automatic bathing ladder is a popular choice among yacht manufacturers, deploying at the touch of a button via a hydraulic system powered by a standalone or centralised power pack (sold separately). Made from 316 stainless steel with a polished or powder-coated finish, it features self-levelling anodised aluminium steps with non-slip inserts, and optional solid teak steps for a premium feel.

Available with either removable or fully automatic stainless steel handrails on both sides, the ladder's adjustable deployment angle enhances safety and ease of use. The standard width is 700mm, with an extra-wide version available at over 1 metre. An electronic sensor alerts the helm when the ladder is deployed and

can immobilise the engines. It is housed in an aluminium box and operates with an electro-hydraulic control unit.

Description

Besenzoni: Luxury Ladders for Yachts and Superyachts

Besenzoni are renowned for producing high-end products, including their range of ladders designed for yachts and superyachts. Their ladders are crafted from premium materials such as stainless steel, carbon fibre, and teak, ensuring exceptional durability and reliability. The range includes bathing and boarding ladders in various configurations, from manual drop-in models and electric options to fully automated hydraulic letterbox designs.
