- Single or double row of manual removable stanchions or automatic stanchions with rigid handrails
- Sensor to alert helmstation when the ladder is deployed in the water
- Aluminium housing box
- Combined with electro hydraulic control unit

Description

The *SI407 Aquarius* bathing ladder is a firm favourite of yacht manufacturers worldwide. Being a fully automatic system, the ladder simply deploys at a touch of a button. The ladder functions on a hydraulic system and requires a power pack to operate. This can either be a standalone unit solely for the ladder (sold separately) or it can be grouped together with other hydraulic products on a centralised system on board.

The ladder is constructed from 316 stainless steel and can be supplied in either a polished or powder coated finish. Optional solid teak steps finish the ladder and offer a high quality feel, extending the teak deck into the water. As standard the ladder is constructed with anodised aluminium steps with a non-slip insert. Additional features include either removable stainless steel handrails or fully automatic handrails that seamlessly deploy when the ladder is operated. The added security of the handrails on both the port and starboard side of the ladder, combined with the adjustability of the deployment angle, make the *SI407* one of the most user friendly models available on the market. The steps are self-levelling, making getting in or out of the water easy and safe for all users. Furthermore, the *SI407* is available in an extra wide specification. In standard trim, the ladder is a generous 700mm wide. The extra wide model offers an outstanding total width of just over 1 metre.

The *SI407 Aquarius* features an electronic sensor system which can be used to alert the helm when the ladder is deployed and can for instance be used to immobilise engines.

Additional Information

Cassette Height (mm)	195.00
Cassette Length (mm)	3160.00
Maximum Extension (mm)	2020.00
Operation Type	Hydraulic
Weight (kg)	215.000000
Manufacturer	Besenzoni
Finish	316 Stainless Steel
