

Door Handle With Knurled Finish

Product Images

Brunton finish pictured, available on request.

Short Description

Elevate the aesthetics and functionality of your doors with our pair of solid brass knurled door handles, designed with every detail in mind.

These handles come complete with matching roses and a spindle, ready for installation. Suitable for doors with a maximum thickness of 42mm, the handles offer versatility and durability. The addition of a nylon spring-loaded securing rose ensures self-righting of the handles. Their concealed fixings create a clean, seamless look, and the knurled finish adds a tactile dimension to their timeless design, with a choice between a chrome or a satin chrome plated knurled grip.

On request this product can be supplied in a Bruniton finish. Bruniton is a process similar to PVD, where a

substance made up of particle of PTFE (Teflon) are bonded onto the surface of a component under high pressure. The finish is very durable and suitable for exterior marine applications (available in matt black only).
