- Aluminium housing box
- Bottom rung handle design for easy operation
- Safety snap closure
- Sensor to alert helmstation when the ladder is deployed in the water

## Description

---

The *SM410* manual bathing ladder is a simple yet effective bathing ladder solution. The ladder is a fixed length extractable unit and is deployed by simply pulling firmly on the ladder and drawing it out from its cassette.

The ladder is constructed from stainless steel and can be supplied in either a polished or powder coated finish. As standard, the ladder is produced with stainless steel steps. On request, solid teak treads are also available offering a high quality feel and extending the teak deck into the water.

The *SM410* features an electronic sensor system which can be used to alert the helm when the ladder is deployed and can for instance be used to immobilise engines.

The ladder can be further customised on request with custom dimensions to suit a production boat builder's specific requirements.
