

P451 Fly

Product Images

Short Description

The P451 Fly Pilot Seat is an iconic contemporary captain's chair. Using the latest constructional technologies such as carbon fibre mouldings for the seat structure, the P451 is the perfect choice for those looking for an innovative and sporty solution, and this pilot seat wears this innovation on the outside with a stunning visible gloss carbon fibre frame. Inspiration for the design of this special helm seat came from the motorbike industry, in particular, the famous café racer style seats influenced by the early-1960's Grand Prix road racing motorcycles.

The pilot seat can be customised to a large extent, with a choice of upholstery materials including customer own supply. Other customisable features include embroidery details such as stitching patterns and inclusion of an embroidered logo as well as custom armrest solutions. In addition, the seat can be further personalised

with a range of pedestal and footrest combinations.

We encourage any prospective client to contact us to discuss their requirements so that we may be able to guide them through the purchase of this product and help select the options required.
