The Molino steering wheel is a contemporary polyurethane design that represents excellent value for money. The all-polyurethane construction means that the wheel is perfect for use in hard environment installations such as open RIBs and work boats.

- Available with decorative chrome inserts with Gussi centre cap, or a black version with brushed grey inserts and centre cap
- Moulded polypropylene steering wheel with polyurethane grip
- Universal fit
- Ø350 diameter

## Description

---

The Molino steering wheel is a contemporary polyurethane design that represents excellent value for money. The all-polyurethane construction means that the wheel is perfect for use in hard environment installations such as open RIBs and work boats.

The Gussi range of wheels come as standard with a 3/4" tapered key way fitting which is a very common wheel specification and should fit the majority of steering shafts. On request we are able to supply with a splined shaft (longer lead times may apply). We are able to adapt and change the finish to suit your requirements but please note that sometimes we do need a minimum order quantity to be able to make certain changes.
