Short Description

The Yo-Yo XXL TV lift is the largest of the Yo-Yo TV lift mechanisms but still remains a compact design. It will fit a maximum TV size of approximately 46"-50" but it is essential to check the physical TV dimensions before ordering as different display manufacturers have different housing sizes.

The mechanism is constructed from galvanised steel with a powder coated black finish and is suitable for interior application only. The product can be specified in 12Vdc, 24Vdc or 220/230V AC input and will therefore operate on low voltage or mains voltage circuits (must be specified at time of ordering).

Description

Wiring is housed within a flameproof flexible covering that prevents the wiring from being crushed or cut.

Devices with manual or electrical rotation have safety devices: tv cannot be lowered unless it is perfectly aligned.

Other important features:

- Gears and all moving parts are covered to prevent damage
- Electrical components are housed in an ABS waterproof container IP 66
- All components are protected by circuit breaker
- Safety device incorporated to prevent overloading or inverting the polarity.
- Pre-wired system with operation via two way switch (not supplied) or optional remote control with 2 or 4 channels, depending on the number of functions.
- Optional FREE SHOCK SYSTEM which stops the operating unit immediately if it is subjected to excessive force
- Manufactured and assembled according to ISO :9001 standard. PATENT nr. 0001330426
- All items are CE marked No: 2006/42/CE – 93/68 CEE
