

Catamaran Tender Launch

Product Images

Short Description

The TL600, TL1000 and TL1200 have been especially designed for multi-hulled craft. The design provides a platform area where a jet ski or small tender can be stored and easily lowered and retrieved from the water. The three models offer three weight capacities to choose from: 600Kg; 1000Kg and 1200Kg.

The TL600, TL1000 and TL1200 are electrically powered systems, doing away with the need for a hydraulic power pack to operate. This means that the system is lighter and more space efficient than an hydraulic equivalent.

- Pantograph electric system designed for catamaran stern platforms
- Powder coated stainless steel structure
- Synchronised movement
- Optional teak frame and platform surface
- Safety lock system with electric pinlocks
- Electrically powered system
- Capacity 600 - 1000 - 1200 Kg

Additional Information

Weight (kg)	1100.000000
Lifting Capacity at Maximum Extension (kg)	1200.00
Manufacturer	Besenzoni
