

Pantograph Hydraulic Platform System

Product Images

Short Description

The TL type hydraulic platform is a pantograph style system constructed entirely from stainless steel. The product is available in a number of weight capacities to suit a wide number of projects from 400Kg through to 1200Kg. This platform system is best suited to tender and watercraft launching platforms. The total weight capacity includes the weight of the platform structure and tender with engine and all fluids.

- Hydraulic swim platform system
- Passivated and electro-polished stainless steel structure

- Ready for anti fouling treatment (provided by the customer)
- Stainless steel cylinders
- Pantograph movement of the arms
- Synchronised movement of the arms with hydraulic flow divider
- Adjustable connecting bar for optimum synchronisation
- Zinc anodes and wires for electrical continuity
- Locking system with safety hooks included on models with 1200kg or more lifting capacity

Additional Information

Weight (kg)	550.000000
Lifting Capacity at Maximum Extension (kg)	1200.00
Manufacturer	Besenzoni
