

Large Tender Slide System

Product Images

Short Description

The TS1000 tender slide system from Besenzoni offers a simple and effective way to park a mid-sized tender in a dry garage arrangement. The system hydraulically deploys and recovers the slide with an electrically operated winch providing the pulling power in order to draw the tender up and into the garage.

The TS1000 is an ideal solution for yachts with fixed platforms that still want to make use of garage storage

for a mid-sized tender.

- Electric/hydraulic system for tender launch and recovery
- Powder coated stainless steel structure
- Hydraulic movement combined with an electric winch to move the tender
- Vulkolan roller system to facilitate the launching and recovery
- Wired remote control with extendable spiral cable

Additional Information

Weight (kg)	1400.000000
Lifting Capacity at Maximum Extension (kg)	1000.00
Lift Angle (°)	160.00
Manufacturer	Besenzoni
