

Retractable Sun Canopy

Product Images

Short Description

The Besenzoni electric aft canopy offers an excellent sun shade solution for cockpits or flybridge arrangements. Making use of a hardtop structure, the aft canopy can extend at the touch of a button to provide shade to an area below. The structure is made from 316-grade stainless steel and can be supplied with a fabric shade material or a solid moulding infill. This is a completely customisable product and would be manufactured to suit the intended project.

- Structure made in stainless steel
- Electric retractable system
- With on board adjustment
- Back-up device to unlock in case of emergency

- Cloth available in different materials and colours
- To be finished with fibreglass end plate
- Can be customised in width and length
