

Windscreens

Product Images

Short Description

Our custom windscreens are made to our client's designs. Screens can feature curved glass, invisible fixings and of course have a flawless finish. The entire assembly is made from 316 grade stainless steel.

For those on a slightly tighter budget, powdercoated aluminium solutions are available as well as plexiglass instead of glass.

We encourage prospective clients to discuss their design with us, together with budgetary constraints in order for us to suggest the right solution.
