Short Description

The *Spazio 35* stainless steel shower head incorporates an innovative halo LED light module. At the forefront of innovation, the *Spazio 35* creates a unique showering experience for the user, illuminating the cascading water falling from it. By having LED lighting incorporated in the shower head, the product also does away with the need for additional lighting in a shower enclosure. This makes the *Spazio 35* the ideal choice for small space applications.

The shower head is marine-grade, being made entirely from 316 grade stainless steel. In addition, the shower uses a spring fitting concept to securely fasten the head in place and avoid unsightly visible screw heads.

The *Spazio 35* is available as standard in two versions, as a standard shower or with the added feature of a mist function. The user can switch between the two showering modes using a remote shower diverter.
