Short Description

316 stainless steel *Fast Lock* base socket for compatible S38 plug-in accessories such as carbon fibre sun shade poles.

Innovative and patented design allows for rapid docking and removal of multiple accessories. No additional lid is needed as socket features a self-rising lid design. This model has hidden fixings which are accessed by removing a stainless steel cover plate.

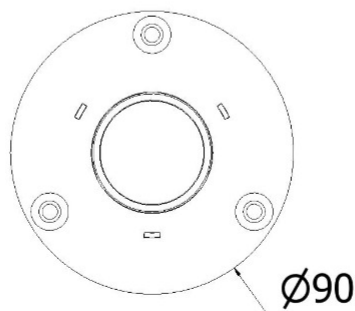

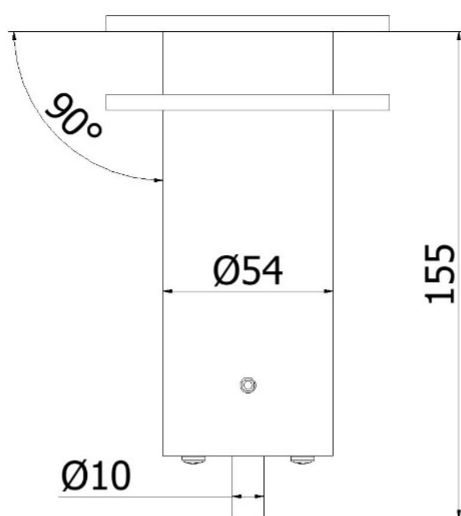

- 316 grade stainless steel
- Spring loaded self-rising lid
- 0° straight or 6° inclined versions available
- Patented rapid docking and release system
- Features a drain connection on underside
- Compatible with S38 Ø38mm accessories

Description

Base Socket

The innovative patented socket features a self-rising lid design. No need to screw and unscrew a lid, just simply push the pole straight into the socket and release with a spring loaded button installed on the base of the docked accessory. The socket also features a drain, allowing any water that enters to be sent straight to bilge.
