

Premium Hatch Locking Device - With Flange - Ø90mm - Locking

Product Images

Short Description

This large polished stainless steel hatch lock features an incorporated flange which elegantly dresses the hole cut-out as well as a counterplate which clamps the lock to the hatch lid. The hatch lock is machined from solid

316-grade stainless steel and is mirror polished. Forming part of our premium range, the lock is hand finished and beautifully engineered; perfect for even the most discerning of customers. Elements such as the patented magnetic system for securing the lifting ring/turning handle to the lock body set this hatch lock apart from the rest.

This version of the large hatch lock is lockable with a custom key. The design of the hexagonal keyway provides maximum security, prohibiting the use of pliers or similar tools to force the lock open.

Standard length of the lever shaft is 60mm but other lengths are available on request.

Industrial PVD coatings are available for this product line. PVD offers superior protection and added hardness to a stainless steel product. During the process, colour can be added which completely changes the final product aesthetic. Black PVD is available for example in a gloss or matt finish (see product image gallery).

Additional Information

Diameter (mm)	90.00
Weight (kg)	0.588000
Finish	316 Stainless Steel
Min. Panel Thickness	~8.50
Cut-out Size (mm)	Ø74.00
Depth (mm)	8.50
