

Thermostatic Shower Mixer & Diverter

£344.00

Excl. Tax: £286.67

Product Images

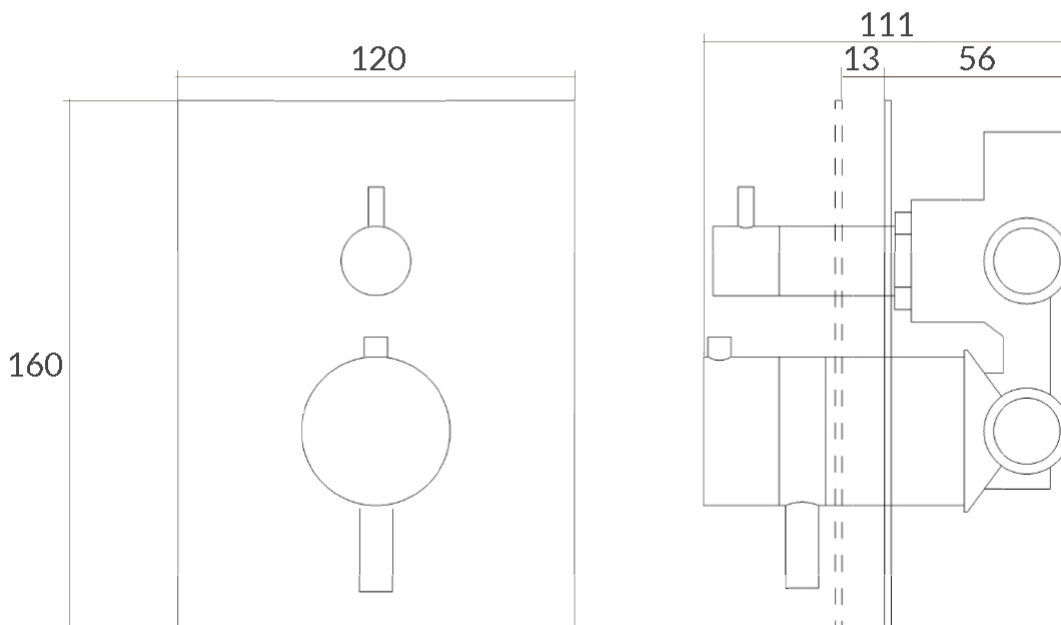

Short Description

Recessed rotary thermostatic shower mixer with diverter valve. This elegant shower mixer is made from brass and is supplied in a chrome plated finish as standard.

The water pressure is controlled via a rotary lever and the temperature can be adjusted using the front dial. The thermostatic cartridge ensures that a safe temperature is maintained at all times, avoiding injury from scalding water.

With a built-in diverter valve, the shower is designed for use with two water outlets such as an overhead shower and a hand-held wall mounted rinse shower.
