

LP200 Ladder and Platform

Product Images

Short Description

Hydraulic Platform with Bathing Ladder Function

LP 200 is an evolution of the LP 100 ladder/platform and allows you to carry out multiple functions within a single product.

The system hydraulically extends from out of its cassette and can then be lowered into the sea to create a stunning and safe bathing area or alternatively raised up to the dockside to provide an impressive full beam boarding facility. A secondary extending section offers added reach for more comfortable and effortless boarding. The LP 200 also has the possibility for use as a platform for lifting tender, in fact, it can lift 400kg in safety.

Constructed from stainless steel and solid teak, the LP 200 is a stunning feature on any yacht and can be customised to suit the project in question.

- Bathing platform with integrated ladder function
- 316-grade stainless steel structure with solid teak platform
- Hydraulic lifting and lowering action
- Secondary extending platform facilitates access to the staircase
- Manual stanchions

Description

Besenzoni: Luxury Ladders for Yachts and Superyachts

Besenzoni are renowned for producing high-end products, including their range of ladders designed for yachts and superyachts. Their ladders are crafted from premium materials such as stainless steel, carbon fibre, and teak, ensuring exceptional durability and reliability. The range includes bathing and boarding ladders in various configurations, from manual drop-in models and electric options to fully automated hydraulic letterbox designs.

Hybrid Function

Ladders with a hybrid function, serving as both bathing ladders and gangways, effectively combine the features of a gangway and a ramp. The ladder can be swiftly transformed into a gangway by adjusting the step inclination, extension, and height. This model has been designed to ensure a safe walkway on steep inclines and to facilitate access to the quay. Customisation options for this type of product are extensive and essential. The technical specifications, including size, tilt, rotation, and finish, can be modified to meet the specific requirements of the shipyard, owner, or designer, allowing for a blend of various technical and aesthetic preferences.
